

2nd January 2014

Dear Australian Vaccination Network

I writing to you in order to offer some assistance in coming up with a new name. On the 24th of December my investigators notified me that you had attempted to register the name “Australian Vaccination Sceptics Network” with the Australian Securities & Investments Commission. Since it is unacceptable for you to adopt such a misleading name I saw fit to register it myself. As you can see online at: www.danbuzzard.net/journal/avn-fails-to-obtain-new-name.html

So as an act of good faith I have asked your critics to help compile a list of names that we feel would be more appropriate for your organisation. Mine is #1, the rest have been added by members of the public.

1. Australian Society for the Spreading of Vaccine Preventable Disease
2. People Against Evidence Based Preventative Medicine, Inc
3. Friends of Pseudoscience in Medicine
4. People For Preventable Diseases
5. Friends of Infant Mortality
